Illustrator
Figma
Premiere Pro
Lightroom

Profile

I am a highly-motivated Full-Stack Web Developer who specializes in Javascript across the whole stack (MongoDB, Express, React, Node). I love to design. I have a passion for creating things. I am a curious person by nature, love learning, and being productive! I'm looking for opportunities to expand my skill set.

Projects

Weight Tracker App

- Built using React js, Express, Node, MongoDB
- Includes authentication login/registration

[Live demo](#) [Code](#)

Chat App

- Google & Facebook authentication
- Realtime chat with logged in users

[Live demo](#) [Code](#)

Dog Breed API

- Dog information fetching from data
- Built using React js

[Live demo](#) [Code](#)

Experience

AKD Homes - Web Developer

- Designed and developed the website that generated 300% the converted leads
- Created mock designs and wireframes and developed landing pages
- Tested and debugging - significantly improved speed and function
- Conducted testing and review of the website for responsiveness clarity and effectiveness

Jojo Investments - Wordpress Web Designer & Developer

- Launched over 50+ clients business initiatives by effectively designing and developing mockups with quick turn arounds.
- Increased company long term value by developing custom Wordpress themes for numerous small businesses.
- Increased client revenue through ad design.
